Published by the Croatian Physical Society

FIZIKA B (Zagreb) Printed issue:
ISSN 1330-0016
A JOURNAL OF EXPERIMENTAL AND THEORETICAL PHYSICS

Published by the Croatian Physical Society

Editor: K. ILAKOVAC, Faculty of Science, University of Zagreb
Associate Editors: B. MELIĆ, "R. Bošković" Institute, Zagreb
M. MILIN, Faculty of Science, University of Zagreb

Editorial Board

P. BUDINICH Interdisciplinary Lab. for Nat. and Humanistic Studies, Trieste, Italy	D. DENEGRI C. E. N., Saclay, France	I. DERADO Max-Planck-Institut für Physik, München, Germany
T. VON EGIDY Techn. Universität München, Garching, Germany	D. H. FENG Drexel University & Oak Ridge Nat. Lab., Philadelphia, PA, U.S.A.	M. FURIĆ University of Zagreb, Zagreb, Croatia
A. LJUBIČIĆ R. Bošković Institute, Zagreb, Croatia	V. PAAR University of Zagreb, Zagreb, Croatia	M. ROSINA University of Ljubljana, Ljubljana, Slovenia
I. ŠLAUS R. Bošković Institute, Zagreb, Croatia		H. ULLRICH Universität Karlsruhe, Karlsruhe, Germany

Subscription rate per volume of Fizika B (one printed issue in 2001): For Croatia: Members of the Croatian Physical Society 50 HRK, institutions 300 HRK; foreign orders \$ 60.

Correspondence and/or calls regarding subscriptions, renewals, address changes and missing or damaged copies should be addressed to:

Editorial Office, Fizika, Bijenička cesta 32, HR-10000 Zagreb, CROATIA
Tel. & Fax. (direct) +385-1-4680055, Exchange: Tel. +385-1-4605571,
Fax. +385-1-4480336, E-mail: ilakovac@phy.hr

Payments should be made by bank transfer to our account, check, bank money order or international postal money order.

Payments in HRK should be made to bank account no. 30102-678-4202

Payments in foreign currency should be made

– bank transfer to ZBZ dd SWIFT ZABA HRXX, account no. 25731-32 39 853 (HFD)

– checks should be sent to the Editorial Office, the payment to: The Croatian Physical Society, account no. 25731-32 39 853.

The journal Fizika B (Zagreb) is financially supported by the Ministry of Science, Education and Sports of the Republic of Croatia

Fizika B (Zagreb) is available online (URL: <http://fizika.hfd.hr>) and on CD-ROM.

CD-ROM editions of Fizika B (Zagreb) Vol. 6 (1997) and further issues are available.

CONTENTS, FIZIKA B, VOLUME 18 (2009)
(by subfields)

Note: The page numbering of articles is done when articles are ready for publication and placed online on Fizika web pages. In these Contents, the articles are rearranged according to the subfields represented in the journal. Therefore, page numbering is not consecutive.

GENERAL PHYSICS

- L. D. Lantsman*: Dirac fundamental quantization of gauge theories is the natural way of reference frames in modern physics (*Review article*) 99
- A. Jahan*: Path integral formulation of sigma model with noncommutative field space189
- Xiang-Yao Wu, Bai-Jun Zhang, Xiao-Jing Liu, Chun-Li Zhang, Bing Liu, Yi-Qing Guo, Yi-Heng Wu, Yan Wang and Qing-Cai Wang*: Quantum theory of neutron multiple-slit diffraction195

NUCLEAR PHYSICS

- A. Tawfik*: Particle ratios in heavy-ion collisions141

PARTICLES AND FIELDS

- B. S. Koranga, S. Mahapatra and S. Uma Sankar*: Determining the sign of Δ_{31} by future long-baseline and reactor experiments151
- B. S. Koranga, M. Narayan and S. Uma Sankar*: Possible CPT violation from Planck scale effects219

ASTROPHYSICS AND COSMOLOGY

- G. Mohanty, G. C. Samanta and K. L. Mahanta*: Five-dimensional string cosmological model in second self creation theory 1
- R. K. Tiwari*: Bianchi type-V cosmological models with constant deceleration parameter in scalar-tensor theory 9
- R. Bali and P. Kumawat*: Bianchi type I bulk viscous fluid tilted cosmological model filled with disordered radiation and heat conduction 19
- A. Pradhan, H. Amirhashchi and M. K. Yadav*: LRS Bianchi type II string cosmological models for perfect fluid distribution in general relativity 35
- R. K. Tiwari, S. S. Tiwari and P. Pandey*: A model to explain varying G and Λ with constant deceleration parameter 43
- K. S. Adhav, A. S. Nimkar, M. R. Ugale and V. B. Raut*: Bianchi type-I cosmological model in Lyra's manifold 55
- A. Pradhan*: Plane symmetric viscous fluid universe with decaying vacuum energy density Λ 61
- R. E. El-Nabulsi*: Lyra cosmology in $D = n + 4$ dimensions: the interesting cases of $n \geq 6$ and $n \leq 104$ (*Letter to the Editor*) 81

<i>Mohd. Zeyauddin and Shri Ram:</i> Bianchi type V imperfect fluid cosmological models with heat flow	87
<i>A. K. Yadav and A. Bagora:</i> Thermodynamics of plane-symmetric inhomogeneous universe in general relativity	165
<i>R. K. Tiwari and U. K. Dwivedi:</i> Bianchi type-III string cosmological models with bulk viscosity and time-dependent Λ term (<i>Letter to the Editor</i>)	181
<i>Shri Ram, M. K. Verma and Mohd. Zeyauddin:</i> Anisotropic viscous fluid cosmological models with heat flow in Saez-Ballester theory of gravitation	207
<i>Raj Bali and Naresh K. Chandnani:</i> Bianchi type-I magnetized stiff fluid models in Lyra geometry	227
<i>A. Pradhan and P. Mathur:</i> Inhomogeneous perfect fluid universe with electromagnetic field in Lyra geometry	243

Authors are advised to consult “Instructions for Authors” on Fizika web pages at <http://fizika.hfd.hr> before starting preparations of the manuscript for submission for publication in Fizika B.

INSTRUCTIONS

Fizika B is a journal publishing the results of original experimental and theoretical research work in general physics, nuclear physics, particles and fields and astrophysics and cosmology.

Contributions written in English, French, German or Russian are accepted. They should be submitted in duplicate, typed on good quality paper on one side only, with double spacing and wide margins, with original drawings of figures and one further copy of the title and abstract in English if the original is in a different language. The abstract should not exceed 600 letters including all symbols.

The front page of each manuscript should include the title of the paper, author's full name(s), affiliation(s) with full address(es) and preferably the UDC and PACS classification numbers. To speed up communication, authors are encouraged to provide e-mail address, FAX and telephone numbers. Unless requested otherwise, the e-mail address and/or FAX number will be published with the author's address.

International system of units (SI) should be used whenever possible, particularly in quoting final results and in table and figure inscriptions.

The figures should preferably be produced by a laser printer on good-quality white paper or drawn in Indian ink on tracing paper. Figures should be fully lettered. Black and white photographs on glossy paper with high contrast are accepted. Reduction to about 1/3 of the original size is usually used. The lettering in the figures must be large enough to make the final size at least 1.5 mm high. All figures should be numbered consecutively with Arabic numerals in order of appearance in the text, and each should have a descriptive caption.

Each table should be numbered sequentially and should have a descriptive caption.

References should be numbered consecutively with Arabic numbers in square brackets. In the text the abbreviation et al. should not be used for papers written by two authors. All references should be listed on a separate sheet and **should include the names of all authors**. (Except for very large collaborations of more than about 10 authors.) The references should be written using the following style: [5] S. Smith and J. K. Jones, Phys. Rev. **295** (1972) 422.

Equations should be written carefully and clearly and numbered sequentially on the right-hand side. Special care should be paid to all symbols that can be misread, confused or are ambiguous (e.g. to distinguish between subscripts and superscripts). Please add a note in the margin to avoid such ambiguities or to explain special symbols.

The footnotes should be numbered in Arabic superscripts and placed at the bottom of the page in which they appear in the manuscript.

When typing the manuscript, authors are strongly advised to consult recent issues of Fizika.

A shorter paper, not subdivided into sections, of less than 600 words in length, with a modest number of illustrations and a short abstract, should be submitted as "Letter to the Editor".

For refereeing purposes only, papers including figures may also be sent by FAX. After the paper has been accepted for publication, the author(s) will be advised to send two original copies, including figures, to the Editor for further processing.

To speed up the publication, the authors of accepted papers are encouraged to send a source file of their papers in standard L^AT_EX (style "article") or in plain T_EX without any author-defined styles and/or macros, and figures in PostScript format. This can be done by electronic mail or on a floppy disc (MS-DOS). Please read "Instructions for Authors" on our home pages.

When submitting a paper, the authors should include a covering letter, signed by one of the authors, clearly requesting publication of the paper in the journal Fizika.

The submission of the paper will be taken to imply that no copyright will thereby be infringed.

There is no page charge for publication of papers and authors are entitled to 30 free reprints.

The manuscripts of papers accepted for publication are not returned.

Manuscripts for publication and all correspondence should be sent to: The Editor, Fizika, Bijenička c. 32, HR-10000 Zagreb, CROATIA. FAX +385-1-4680 336 or +385-1-4680 055, e-mail: ilakovac@phy.hr.

SERVICE FOR THE READERS OF THE JOURNALS FIZIKA A & B

The contents and abstracts of Fizika A and Fizika B since 1992 (in hypertext) and full articles since 1997 (in ps and pdf formats) are available on the computer network Internet. They can be accessed by using the following URL of our home pages:

<http://fizika.phy.hr/> or <http://fizika.hfd.hr/>
